

Is clear aligner therapy the right process for me?

TrioClear® aligners can only be prescribed by a dentist – so it's important to consult with yours and follow their guidance. Clear aligner systems generally help with treating:

CROSSBITE
If your upper and lower jaws are misaligned – which can happen between your upper and lower front teeth or back teeth.

GAPPED TEETH
If the spaces between your teeth are too wide.

OPEN BITES
When there's excessive space between your upper and lower front teeth, preventing normal chewing and talking.

OVERBITE
If your upper teeth cover your lower teeth more than normally.

OVERCROWDING
When there isn't enough room for your teeth in your mouth.

UNDERBITES
When the lower teeth bite over your upper front.

AN INCREDIBLE IMPACT. IN MORE WAYS

Choosing TrioClear® means choosing a global brand – with the reputation you can rely on. We continue to invest in technology and outstanding support so you can feel confident you're making incredible progress.

We're committed to making sustainable progress for the environment too, with a tree planted in Australia and New Zealand for every TrioClear® system sold.

Trio CLEAR

An incredible smile?
EASY AS 1. 2. 3.

Why choose TrioClear®?

- 1. IT'S EASIER TO COMMIT TO.**
Your dentist is trained in TrioClear's® precision technology – so you can spend less time in the chair and more time feeling comfortable and confident wearing our near-invisible aligner system.
- 2. IT'S EASIER TO BE TREATED.**
With features like pre-formed buttons on the aligner (not your teeth), minimal attachments and a 7-day changeover, you'll enjoy better oral health and hygiene while the TrioClear® system is at work.
- 3. IT'S EASIER TO SEE RESULTS.**
Our progressive force system means your dentist can get a clearer picture for how your teeth will move during treatment. And you'll see progress in less time too.

**READY TO LET YOUR SMILE SHINE?
READY FOR TRIOCLEAR®.**

Consult your doctor today.

TrioClear® Aligners cannot be sold to the general public. Your dentist will be able to advise what treatment plan is right for you. You should always follow their instructions and health advice.

Clear steps towards your best smile yet

The path to straighter teeth shouldn't be hard work. TrioClear® makes it easier than ever for you to see real progress – through a process that's more efficient and effective.

How it works

TrioClear® uses a progressive force system of soft and hard aligners for more predictable movements – and better results. Our removable aligners are custom-made and nearly invisible, fitting comfortably and working seamlessly as they gradually move your teeth towards an incredible smile.

TrioClear® systems are suitable for treating minor to moderate teeth straightening. Ask your dentist if they're the right fit for you.
